

SPECIES	BEST TIMES	RECOMMENDED BAIT/LURE	TACKLE WORLD TIP
Barramundi	February to May September/October (Closed season 1st Nov to 1st Feb midday each year)	Baitcast/Spin Tackle 20lb/30lb Braid (Fins, Nitlon or Rovex Viros) 50lb to 60lb Mono Leader (Instinct XTS plus) Lures: Strada (Varoius), Bolt Omega, Barra Classics, RMG Scorpions, Lead's Hi-Jackers/shads, Lance's Lures, Soft Plastics (Squidgys, Gulp & DOA Prawns) Live bait: Prawns, mullet & mud herring.	When casting lures put plenty of tip action twitches in a slow retrieve for you hard body lure letting them suspend or slowly float in the target area. Target areas include the flats, oyster rocks, snags and gutters. Trolling is also very effective with lures capable of bumping the bottom of the water depth fishing, also use plenty of tip action working the lure. Ideal trolling structure includes snags, rock bars, creek mouths and drop off edges. Many lures need treble upgrades and must be kept sharp. Live Baiting: target structure holding fish. Owner Mutu light Circle or Instinct Octopus hooks are very effective. Prawns can be fished under a float when fishing structure while mullet and herring are best fished on the bottom. Ask your local Tackle World store for the hot locations & best tides.
Fingermark	Headlands: October to February Estuary Creeks: February to May	Baitcast/Spin/Jig Braid/Jigging Braid or Mono live baiting (as stated previous/ Mono Instinct Lexis/Asari Pearl	When fishing the Estuary Creeks fish the deep holes with rubble particularly if bait is marking. On the Headlands look for isolated rocks in deep water and the drop area of a rock plateau where bait is marking. Live baiting

		<p>40-80lb Mono Leader (dependant on location and fish size)</p> <p>Lures: While can be caught on hard bodied lures both trolled and cast more commonly caught on jigged soft plastics than hard bodies.(Gulp New Squid Vicious)/Squidgys</p> <p>Live Bait: (Best Method)</p> <p>Headlands: Squid(fresh caught), large sardines & mud herring</p> <p>Creek: Prawns, sardines & mud herring.</p>	<p>vary hook to bait and target fish size 3/0-8/0 (Instinct Octopus/ Owner Mutu Circle Light/ Gamakatsu SL12S). Jigging soft scented plastic lures very effective and exciting on spin Tackle.</p>
Coral Trout	March to November Prime Time Aug to Oct	<p>Overhead/Spin Tackle/Handline</p> <p>50lb Braid (As previous) 80LB Mono Leader</p> <p>60-80lb Handline</p> <p>Best Bait: Pilchard & Squid combination. Strip fillet bait also good with pilchard.</p>	<p>Coral trout are predominately caught bottom fishing the reef bommies in depths ranging from 10-40m. A running sinker on top of the hook is the preferred rig to help dislodge if snagged on the reef. Hook sizes from 6/0-8/0 with Instinct Octopus/ Gamakatsu SL12S/ Mustad 540 all suitable models. Burley is recommended & a floater out the back to target Mackerel. Coral trout will also take poppers & minnows cast over the shallow bommies & jigged soft plastics.</p>
Mangrove Jack	March/April September to December	<p>Baitcast/Spin Tackle</p> <p>20lb/30lb Braid (Fins/Nitlon/Rovex Viros)</p>	<p>Look to target heavy timber and often way at the back of structure is their preferred ambush position. Rock Bars are another popular home</p>

		<p>40/50lb Mono Leader (Instinct XTS plus)</p> <p>Lures: Strada(various), Bolt Omega, Lead's Hi Jackers/Shads, Mann's Stretch, Soft Plastics (Squidgy's, Gulp, DOA Prawns.</p> <p>Live Bait: Prawns, mullet & fresh mullet fillet also effective</p>	<p>for these strong fighting fish. Quick reflexes and strong drag require to prevent being bricked into the snag & structure. Diving lures usually most effective but will take shallow lures such as Lead's Hi-Jackers. Lure action similar to barramundi technique.</p> <p>Live Baiting: Instinct Octopus hooks with size dependent on bait size Ask our expert staff for the hot locations & best tides.</p>
Large Mouth Nannygai	May to September	<p>Overhead Tackle/Quality Spin/Handlines</p> <p>50-80lb Braid/80lb Mono Leader (Instinct)</p> <p>80-100lb Handlines Best Bait: Pilchard & Squid Combination</p>	<p>Large Mouth Nannygai are usually caught fishing deep water from 30-60m with a rubble bottom, isolated rocks and gutters away from the hard reef. Hooks from 7/0-10/0 are recommended with Instinct Octopus/Gamakatsu SL12S/Mustad 540 patterns all suitable. Generally a paternoster rig is used with a snapper sinker ranging from 4oz-12oz dependent on depth and current. Braided line with less drag & little stretch are an advantage.</p>
Spanish Mackerel	May to Nov	<p>Overhead/Spin Tackle</p> <p>10-15kg Mono Trolling 30-50lb Braid Jigging (As previous)</p> <p>60-100lb Mono Leader (dependant on method) Instinct XTS plus</p> <p>Lures (Trolling)</p> <p>Strada Tracka 160/140, Bolt Mystique, Dog</p>	<p>Troll the reef edges and pinnacles holding bait schools. Ensure you float out a pilchard or live bait out while bottom fishing and use burley. Jigging the wrecks with a high speed retrieve very effective. Big Mackerel love a slow trolled rigged Wolf Herring.</p>
